Kobido

Kobido means “the ancient path of beauty” and is known as the massage of “eternal youth”. This traditional Japanese facial massage has been used for centuries. Kobido massage is an effective technique for preventing and treating wrinkles. It stimulates and works on specific points, the meridians of the face and neck by using friction, quick movements and fingertip pressure. It improves blood and lymphatic flow, encouraging the natural regeneration of the tissues.

Try your natural face-lift on its own or in combination with Shibui:

INCANTO POOL

Be embraced by warm water in an elegant pool room with many hydro-massage points. Set in an environment featuring fine architectural elements, the Incanto pool is sanitized with liquid oxygen: this special system allows guests to enter fresh, odour-free water, which is devoid of harmful chlorine by-products and more gentle on the eyes and skin.

ATTIVA POOL

Directly accessed in the lift and connected to the Allegra pool, it is our covered pool dedicated to water activities: water fitness, hydrokinesis and hydrobike help with rehabilitation and remise-en-forme in a gentle and relaxing manner.

ALLEGRA POOL

Set among the greenery in our garden with water features and hydromassage, the Allegra pool brings serenity and happiness thanks to its sunny position and its sinuous contours.

LA FONTE ELISEO 1956

The first and only therapeutic source of thermal water for bathing with pure unfiltered and chlorine-free thermal water, at the Terme di Abano and Montegrotto.

Built over our first thermal water table discovered in 1956, “La Fonte - Eliseo, 1956” pool boasts a constant flow of thermal water that naturally springs from the depths of the ground after being enriched with precious minerals for thousands of years. It differs from all the other pools due to the absence of any chemical agents that would alter its beneficial properties. Therefore, it is the only pool that can now be considered therapeutic. This ancient water source brings together nature, history and health.

THE PROPERTIES OF THE WATERS

The waters of this spring belong to the category of deep underground waters. The uniqueness of these thermal waters arises from the long journey the waters have to get to the Euganean Spas. Water comes from the Pre-Alps and flows underground through limestone, arriving at a depth of 3,000 metres. The water has been kept at a high temperature and under high pressure for a distance of about 80 kilometres over a period of several thousand years. Along the route, the water is enriched with mineral salts and then reaches two wells in the spa garden of Hotel Eliseo, where it springs out at a temperature of 87 °C.

The abundance of dissolved substances makes our thermal water unique in the world: it is chemically classified as hyper-thermal saline-bromine-iodine water with a fixed residue at 180° of 5-6 grammes of dissolved salts per litre.
